20 July 1960

MEMORANDUM FOR : Development Branch, DPD

ATTENTION :

SUBJECT : J-58's Engine Design Compromises

Your report of 8 July (OXC-0617) has been read by Mr. Bissell and found to be extremely interesting. I trust that you will continue to keep in close touch with this situation. I should like you to be prepared to summarize the status of P & W's activities in this area as of the end of the first week in August. It might also be well for you to alert P & W that a meeting may be desirable here sometime between 8 - 19 August if by that time customer decisions on cost weight and mach number trade-offs are indicated. I suspect that Lockheed representation should be available as well. I hope that you will also be able to introduce the hot day operation and P & W plans as mentioned in their April Progress Report, page 5 paragraph 4.
